

Axon Body Mini

Wearable Cameras Designed to Protect Clinical Staff

Axon Body Mini is a compact, scalable safety solution purpose-built for healthcare professionals, including nurses, front desk staff, patient transport staff and other frontline caregivers. It combines real-time streaming, panic activation, and integrated AI tools to help reduce escalation, increase confidence, and improve outcomes in high-stress environments. The AB Mini goes beyond traditional hallway cameras or legacy duress buttons, empowering clinical teams directly and providing centralized oversight through Axon OS.

Benefits

Encourage De-Escalation Through Visibility

Clearly visible but non-threatening body-worn devices help reduce aggressive behavior in emergency and behavioral health settings. A discreet panic button begins recording and immediately alerts the hospital's security operations center.

Support In-The-Moment Response

Live video streaming over secure hospital Wi-Fi allows security and clinical supervisors to monitor evolving situations and respond more quickly with appropriate resources. This visibility helps mitigate risk to staff and patients.

Improve Patient Communication

Built-in real-time language translation enables healthcare professionals to communicate in over 50 languages, helping improve experience and reduce misunderstandings. The friendly device aesthetics and customizable Canvas LED display promotes trust and clarity.

Simplify Post-Incident Review

Recordings are automatically uploaded and securely stored for internal review, compliance reporting or legal response. This streamlines incident investigations and supports accurate documentation.

Features

Integrated panic button that prompts recording

Consolidate your safety tools into one easy-to-use, connected device so your staff receive more support, faster.

Precise location accuracy

Live streaming with precise location accuracy (5m) brings eyes onto the scene to reduce risk and make more informed safety decisions.

Bi-directional communications

Enable support teams or leadership to communicate with frontline staff via voice, providing guidance during stressful moments.

Axon AI Plan ready

Provide staff with AI tools like real-time policy information and language translation, facilitating better communication and adherence to organizational policies.

Customizable Canvas LED

Allows businesses to build trust and provide a friendlier experience by customizing the Canvas LED panel, with 63 front LEDs, for their unique brand.

12+ hour battery life

Long-lasting battery keeps frontline staff protected across the duration of their shift with a lightweight, unobtrusive form factor.

Mount-Based Assignment

Empower staff to grab any unassigned camera from a shared pool and instantly assign it them by placing it on their mount—no manual setup required. Leveraging NFC-based mount recognition, this workflow accelerates shift start times and ensures all captured footage is automatically associated with the correct user upon upload.

Training supported by Axon MetaCoach

Enable your staff with immersive, AI-powered training videos that help them practice using their body-worn camera during a variety of situations.

Simple and secure evidence sharing

Helps resolve crimes and incidents more quickly and efficiently by securely sharing recordings with local law enforcement.

Technical Specifications

Colors	Red, white, blue, dark blue, light green, dark green, grey, orange, yellow
Weight	100 grams (0.22 pounds)
Dimensions	25.5mm (Depth) x 73.1mm (Height) x 45.7mm (Width)
Video Resolution	1080, 720, 480
Battery Life	12 hours
Pre-Event Buffer	Configurable up to 120 Sec
Connectivity	Wi-Fi (5GHz and 2.4GHz), Bluetooth 5.1, and Active NFC
IP Rating	IP67
US Military Standard	MIL-STD-810H
Canvas LED	63 front LEDs to form customizable display
Storage	64 GB non-removable eMCP
Encryption	XTS-AES-256 full disk encryption
